Notes:

1. In-place telephone line connection - A working telephone socket exists from a previous connection and a Telstra technician is not required to visit the premises.
2. In-place telephone line connection with technician visit - A previous telephone service existed at your business premises and a Telstra technician is required to visit your business property / premises to reconnect existing suitable cabling at the Main Distribution Frame (MDF) or first socket where no Main Distribution Frame exists.
3. New telephone line connection - a telephone service has not previously been connected at your property or premises (although we may have previously installed cabling to your property or premises and you may be able to hear a dial tone).
4. New telephone line connection - Telephone line connection with a technician visit with cabling work - a previous telephone service existed at your property or premises and one of our technicians is required to visit your property or premises to install and/or work on the cabling up to the main distribution frame or first socket where no main distribution frame exists.
5. Please note that any non-standard installations may also be subject to Telstra's Fee for Service Charges (FFS). FFS will be charged when your customer's premises has an MDF and work to complete installation to the first socket is authorised, or when installation of additional sockets has been specifically requested.
